

Car Rental

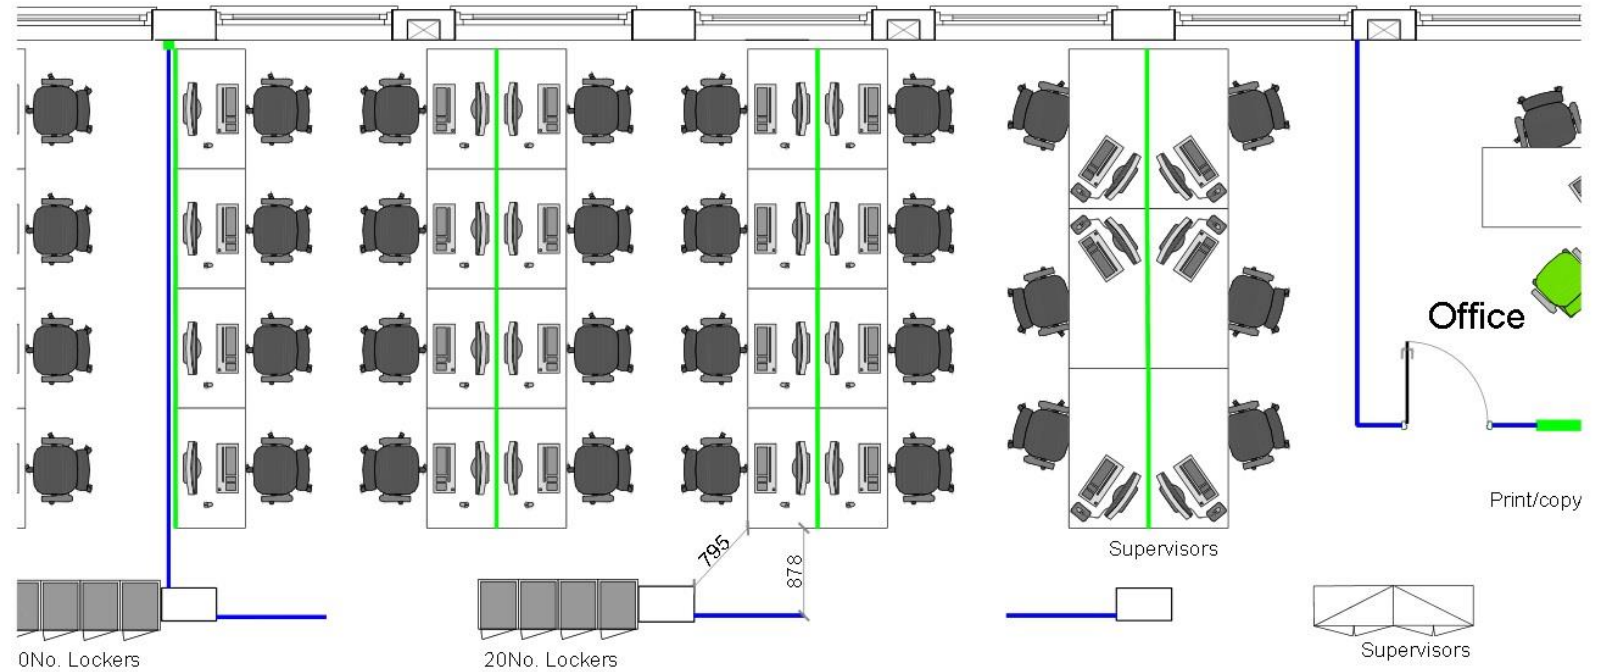

The image shows a large, empty office space. In the foreground and middle ground, there are several rows of cubicles. Each cubicle has a white desk and a white partition with a grid of small square holes. The floor is covered with dark grey carpet tiles, and there are several yellow square tiles placed on the floor in a pattern. The ceiling is white with recessed fluorescent lights. On the right side, there are large windows with white frames, providing a view of the outdoors. The overall atmosphere is clean and modern.

The Project

The project objective was to revamp a Call Centre for a national car rental business. The business had decided to upgrade its desking and storage facilities throughout this Head Office branch.

The furniture had to match the specification of the other offices so cost was a crucial factor. We arranged for a sample desk, pedestal and monitor to be set up on site so that the client could see what we were proposing.

Working in conjunction with the on site fit out contractors we installed each area without impacting on the running of the business and since the initial installation have returned to supply additional furniture to other areas.

Services Provided

Industry sector

Automotive

Location

Hampshire

Project year

2017

Budget cost

£60,000
