

Bespoke Office Planting

Benefits of Planting

Planting offers a number of benefits for both employees and employers. By improving air quality, reducing stress levels, increasing productivity, enhancing aesthetics, and improving employee morale, plants can create a more positive and productive work environment for everyone.

Living plants aren't always a practical option for many workplaces due to low light levels, access to water and the ongoing maintenance costs needed to ensure these displays thrive. Our team have the experience and expertise to advise on the planting that is best suited for your space.

We often create mixed landscapes using live planting at ground level where access for maintenance is easier and then artificial planting for high level displays and darker locations.

Ultra-realistic planting

The fake planting schemes we create are incredibly realistic giving you all the visual benefits of live planting without the additional commitment and costs of caring for live plants.

Gone are the days of faux foliage with papery plastic leaves and flowers with lurid colour combinations. Artificial planting has moved on. Our bespoke artificial planting schemes look so naturalistic that you might find yourself checking that your new landscape doesn't require watering.

Floor Standing & Table Top Planting

Displays that transform an office space without breaking the budget. Our team are experts at creating these realistic displays using a variety of architectural foliage and carefully selected planters to complement the style of the workspace.

Define different workspaces and enhance privacy naturally with bespoke planting displays within office storage units and furniture. Cabinet toppers are an effective way to integrate planting into an office layout, creating green avenues along walkways, whilst discouraging the clutter of paperwork on top of furniture.

A low maintenance and versatile way to instantly create a more inviting and relaxing work environment. These artificial displays are immune to disease and pests such as the troublesome fungus gnats that live schemes often attract.

High Level Planting

Elevate the appeal of your workspace with high-level artificial planting. A popular choice for modern offices these unique planting schemes can be created on ledges, fixed to beams, facias and ceilings or suspended from rafts or hanging baskets. Adding green interest where live planting wouldn't thrive and preserving valuable floorspace. These displays create a sense of depth and dimension drawing the eye upwards and adding a touch of drama to the interior design.

Unlike other landscapers we manage the whole process end to end from the initial design concept to build and final installation so that all aspects of your project are safe in our experienced hands. Our skilled installation team is fully site compliant with all necessary qualifications to work at height.

Moss Walls

The perfect way to transport the beauty and benefits of nature into a space without the added commitment of maintenance. These decorative walls are made from moss which has been harvested sustainably and preserved with natural ingredients that replace the water in the cell structure. They don't need light or water and are built to last for years.

As well as creating a real focal point in your work space they also absorb sound which can be a real benefit for reducing noise in a busy office.

Green Walls

Our bespoke green walls stand out from the rest because they look so realistic. With a designated green walls designer our clients are fully involved in the design process, working together to select the highest quality foliage to fit the brief. From stylish single species walls to lush tropical walls, we can even incorporate flowering elements.

We understand the importance of fire safety and can produce inherently fire-resistant foliated panels with certification as needed.

Branded Walls

Showcase your branding in a unique and natural way. Moss and green walls make an excellent background for company logo signage. We work with a professional sign maker to produce corporate branding which can attach to our walls.

Our visionary creatives can design innovative and trend-setting moss wall art to enhance your space. We can also supply smaller complete moss art pieces which are ready framed to make a big impact where space or budget can be limited.

Trees

With over 30 years' experience we have a skilled team of tree builders that can create just about every type of tree you can think of. With our bespoke service you can specify every aspect of the tree including height, shape, canopy size, trunk style and foliage density. We will work closely with you through every step of the process from the initial design concept to build and installation. These statement trees are long lasting, utterly realistic and unique.
