

# Health Care Provider

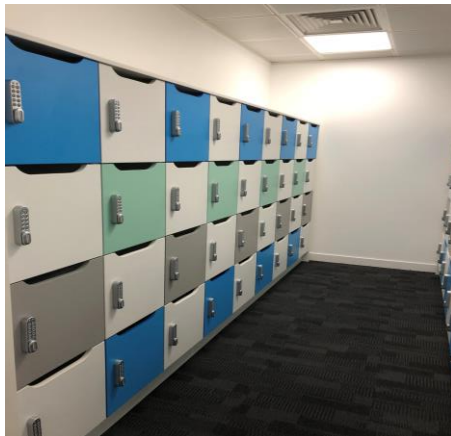

# The Project

The client made the big decision to upgrade its workspace in order to create a safe, healthy agile and modern working environment for all staff in all office locations. Arriving at this conclusion prompted a complete rethink of how existing workspaces were used. Following a tender exercise we were fortunate enough to be selected to provide the office furniture.

A key factor in our selection was the recommendation to reconfigure and re-use their existing desk legs recycling a good proportion of the existing inventory, it also made sense on environmental grounds too.

We introduced meeting booths, high and low meeting areas and created a warm, user friendly office that the staff feel comfortable working in.

The deliveries and installations were carried out in two phases per floor working in coordination with the appointed contractors to ensure minimum business interruption.

# Services Provided

## Industry sector

Health Care Provider

## Location

Andover

Winchester

## Project year

2019

## Budget cost

£500,000

## Project timeline

2 years
