

SYGNUS OFFICE PARTNERSHIP LTD

The return to the office has received a great boost!

The recent budget included an announcement of a 130% Super Deduction for plant and machinery purchases. The term Plant & Machinery covers many items including those involved in the refurbishment and fit-out of new or existing office space.

This will net customers up to 25p in corporation tax for every £1 spent.

Lets take a £100,000 project. With the super deduction you will save an additional 19% corporation tax on the increased £30,000 creating a net additional advantage of £5700 compared to the current tax rules.

Current deductions = 19% of £100,000 = £19,000

Super deductions = 19% of £130,000 = £24,700

Net advantage = £5,700

Now is the time to act.

Let us show you how we can tranform your workspace and save you money.
